CHAPTERS	TITLE	PAGE NO
	LIST OF TABLES LIST OF FIGURES LIST OF PLATES LIST OF APPENDICES	
I	1.0 INTRODUCTION	1-13
II	2.0 REVIEW OF LITERATURE	14-42
	2.1. Edible seaweeds – An overview	14
	2.2. Consumption of edible seaweeds in global scenario	18
	2.3. Toxicological studies of edible seaweeds	22
	2.4. Nutritional importance of edible seaweeds	25
	2.5. Therapeutic value of edible seaweeds	42
III	3.0 METHODOLOGY	53-77
	Phase – I General characteristics of the selected edible seaweeds Toxicological studies of the selected edible seaweeds Acute toxicity Sub-acute toxicity	54-63
	Phase – II Analysis of nutrient composition of the selected edible seaweeds Assessment of the microbial content of the selected edible seaweeds	64-65
	Phase – III Incorporation of selected edible seaweeds in Indian indigenous recipes Sensory evaluation of the indigenous Indian recipes incorporated with the selected edible seaweeds	66-67
	Phase – IV Computation of nutrient content of standard and incorporated recipes with selected edible seaweed powders	77

IV	4.0 RESULTS AND DISCUSSION	78-112
	<p style="text-align: center;">Phase – I</p> <p style="text-align: center;">General characteristics of the selected edible seaweed samples</p> <p style="text-align: center;">Acute and sub-acute toxicity results of the selected edible seaweed samples</p> <p style="text-align: center;">Acute toxicity results</p> <p style="text-align: center;">Sub-acute toxicity results</p>	79-95
	<p style="text-align: center;">Phase – II</p> <p style="text-align: center;">Nutrient composition of the selected edible seaweed samples</p> <p style="text-align: center;">Proximate nutrient composition</p> <p style="text-align: center;">Minerals and vitamins composition</p> <p style="text-align: center;">Moisture and microbial content of the selected edible seaweed samples</p>	96-104
	<p style="text-align: center;">Phase – III</p> <p style="text-align: center;">Incorporation of selected edible seaweeds in south Indian indigenous recipes</p> <p>Sensory evaluation of the indigenous Indian recipes incorporated with the selected edible seaweeds</p>	105-108
	<p style="text-align: center;">Phase – IV</p> <p style="text-align: center;">Computation of nutrient content of standard and incorporated recipes with selected edible seaweed powders</p>	109-112
V	5.0 SUMMARY AND CONCLUSION	113-122
VI	6.0 RECOMMENDATIONS	123
VII	7.0 BIBLIOGRAPHY	124-154
VIII	8.0 APPENDICES	

LIST OF TABLES

Table No.	Title	Page No.
1.	Laboratory methods used for assessing the biochemical parameters in tested animals	63
2.	Biochemical methods used for the estimation of nutrient content of selected edible seaweeds	65
3.	Ingredients used for value added selected edible seaweed (<i>Sargassum wightii</i>) halwa and standard	68
4.	Ingredients used for value added selected edible seaweed (<i>Ulva reticulata</i>) pakoda and standard	71
5.	Ingredients used for value added selected edible seaweed powder (<i>Eucheuma</i>) pickle and standard	74
6.	General characteristics of the selected edible seaweed samples	83
7.	Observation on clinical signs of toxicity at 2 gm/kg of body weight of the selected edible seaweeds	85
8.	Observation on clinical signs of toxicity at 5 gm/kg of body weight of the selected edible seaweeds	87
9.	Changes in body weight of the rats fed on selected edible seaweed samples	88
10.	Gross pathology and mean organ weight of rats	90
11.	Changes in physical characteristics in experimental rats	91
12.	Hematogram of the selected edible seaweed samples supplemented in rats	93

13.	Observation on biochemical parameters of rats fed on selected edible seaweed samples	94
14.	Proximate nutrient composition of the selected edible seaweed samples at the concentration of 100 gm	97
15.	Minerals and vitamins composition of the selected edible seaweed samples	100
16.	Heavy metals composition of the selected edible seaweed samples	102
17.	Moisture and microbial content of the selected edible seaweed samples	104
18.	Mean acceptability scores of selected edible seaweed incorporated halwa	106
19.	Mean acceptability scores of selected edible seaweed incorporated pakoda	107
20.	Mean acceptability scores of selected edible seaweed incorporated pickle	108
21.	Computed nutrient content of the standard and incorporated <i>Sargassum wightii</i> seaweed powder halwa recipe	110
22.	Computed nutrient content of the standard and incorporated <i>Ulva reticulata</i> edible seaweed powder pakoda recipe	111
23.	Computed nutrient content of the standard and incorporated <i>Eucheuma</i> seaweed powder pickle recipe	112

LIST OF FIGURES

Fig. No.	Title	Page No.
I	Coastal line of Tamil Nadu – Mandapam	55
II	Proximate nutrient composition of the selected edible seaweed samples at the concentration of 100 gm	97(A)
III	Minerals and vitamins composition of the selected edible seaweed samples	100(A)
IV	β -Carotene (μg) composition of the selected edible seaweed samples	100(B)

LIST OF PLATES

Plate No.	Title	Page No.
I	Collection of selected edible seaweed as study samples	56-57
II	Animal study - experimental setup	62
III	Ingredients used for preparation of selected edible seaweed Halwa with <i>Sargassum wightii</i> seaweed powder	67
IV	Halwa standard and incorporated with <i>Sargassum wightii</i> selected edible seaweed powder	69
V	Ingredients used for preparation of selected edible seaweed pakoda with <i>Ulva reticulata</i> seaweed powder	70
VI	Pakoda standard and incorporated with selected edible <i>Ulva reticulata</i> seaweed powder	72
VII	Ingredients used for preparation of edible seaweed pickle with selected edible <i>Eucheuma</i> seaweed powder	73
VIII	Pickle standard and incorporated with selected edible <i>Eucheuma</i> seaweed powder	75

LIST OF APPENDICES

APPENDIX NO	TITLE	PAGE NO
I	Biochemical procedures used for the study	i
II	Internal Research and Review Board (IRB), Ethical clearance (EC), Biosafety and Animal Welfare Committee Letter	xxviii
III	Procedures used for nutrient analysis	xxiv
IV	Procedures used for microbial analysis	xl
V	Nutrient content of the standard halwa /100 gm	xlii
	a. Nutrient content of the 2 percentage <i>Sargassum wightii</i> seaweed halwa/ 100 gm	
	b. Nutrient content of the 4 percentage <i>Sargassum wightii</i> seaweed halwa/100 gm	
	c. Nutrient content of the 6 percentage <i>Sargassum wightii</i> seaweed halwa/100 gm	
VI	Nutrient content of the standard pakoda /100 gm	xlvi
	a. Nutrient content of the 2 percentage <i>Ulva reticulata</i> seaweed pakoda/100 gm	
	b. Nutrient content of the 4 percentage <i>Ulva reticulata</i> seaweed pakoda/100 gm	
	c. Nutrient content of the 6 percentage <i>Ulva reticulata</i> seaweed pakoda/100 gm	
VII	Nutrient content of the standard pickle/100 gm	l
	a. Nutrient content of the 2% <i>Eucheuma</i> seaweed pickle /100 gm	
	b. Nutrient content of the 4% <i>Eucheuma</i> seaweed pickle /100 gm	
	c. Nutrient content of the 6% <i>Eucheuma</i> seaweed pickle /100 gm	
VIII	Score card used to find out the acceptability of the selected edible seaweed powder incorporated recipes	liv
